

THE ENEMY WITHIN

The U.S. Defense Department is shifting tracks as it plans for information assurance. The complexity of modern military networks now virtually guarantees enemy intrusion, impelling the department to prepare for operations amid attacks.

BEAMING INTO A PARALLEL WORLD

Not content with the content in existing virtual reality environments, the U.S. government has created its own. This new federal parallel realm is a venue for specialized training and education as well as networking in cyberspace.

62

BET ON A CLOUDY DAY

Planners do not expect to roll snake eyes when looking at cloud computing. Experts have adapted a craps table to serve as a strategic modeling tool for using that means of information processing in a range of scenarios.
